SUMMARY

Versatile Full-Stack Developer with a strong foundation in Computer Engineering and a track record of delivering end-to-end web applications — from database design and RESTful API development (Node.js, Express, MongoDB/MySQL) to dynamic, responsive frontends (React, Next.js, TypeScript, Tailwind CSS). Passionate about writing clean, maintainable code and building scalable solutions that prioritize user experience and performance. Experienced in agile environments, cross-functional collaboration, and turning complex requirements into intuitive digital products.

EXPERIENCE

Full Stack Developer | TMC Company | 3 Months

- Designed and developed Souq, a comprehensive multi-vendor e-commerce platform from scratch.
- Implemented full-stack architecture using Next.js (App Router), Node.js, Express, and MySQL.
- Built role-based access control system for Admin, Merchant, and Customer roles.
- Integrated bilingual support (Arabic/English) with i18n and dark/light mode toggle.

Frontend Developer | Zenobia Organization | 2 Months

- Developed responsive admin dashboard for data management and analytics.
- Implemented user interface components using Next and modern CSS frameworks.
- Collaborated with backend team to integrate RESTful APIs.
- Enhanced user experience through responsive design and performance optimization.

SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express, RESTful APIs, JWT Authentication
- **Databases:** MySQL, MongoDB
- **Programming & Scripting:** JavaScript, TypeScript, HTML/CSS
- **Tools & Practices:** Git, GitHub, Postman, VS Code, Responsive Design, SSG/ISR (Next.js)

TRAINING & CERTIFICATIONS

- Complete Web Development Bootcamp
- React - The Complete Guide
- Node.js & Express - Backend Development
- MongoDB Database Design
- Next.js & TypeScript - Advanced Development
- RESTful API Design & Development

EDUCATION

PERSONAL PROJECTS

Souq — Multi-Vendor E-Commerce Platform

Designed and built a professional multi-vendor e-commerce platform where merchants can register, manage their stores and products, track real-time inventory, view financial reports (sales, commissions, settlements), and handle shipping. Built with Next.js (App Router), Tailwind CSS, Node.js, and MySQL, it supports Arabic/English localization and includes dark/light mode toggle. Features role-based access control, full store and product management, inventory alerts, and complete shopping cart and checkout flow.

Personal Portfolio

Developed a high-performance, fully responsive portfolio website using Next.js and Tailwind CSS. Optimized for fast loading and SEO, leveraging Next.js SSG and ISR. The design is clean, modern, and demonstrates frontend development skills.

Food Delivery Application

Built a full-stack food delivery application with React frontend and Node.js/Express backend. Features secure JWT authentication, cart management using React Hooks, and MongoDB Atlas integration. Includes admin interface for menu management.

Books Store App

Created a responsive books store application using React and Bootstrap with real-time filtering, instant add/delete functionality, toast notifications, localStorage persistence, and user authentication (login/signup).

CRUD Application Template

A full-stack, reusable CRUD template built with React, TypeScript, and Node.js/Express to accelerate the development of data-driven applications. The frontend features a clean, responsive interface using Tailwind CSS and supports offline functionality through localStorage persistence, while the backend provides a scalable RESTful API with seamless integration to MongoDB (or other databases) for production use. Designed with generics and modularity in mind, the template easily adapts to any data model—such as products, users, or inventory items—making it ideal for admin panels, internal tools.

LANGUAGES

- **Arabic:** Native
- **English:** Intermediate (Work Proficiency)
